Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.

- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.
- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

1	<p>Philippine National Standard Specification for POLYETHYLENE (PE) Pipes (SDR-11) for Potable Water Supply (PN12.5) with a nominal outside diameter of 90mm and nominal inside diameter 73.64mm intended for the conveyance of potable water under pressure and of temperatures up to 20 °C for use below the ground.</p>	

2	PE (SDR-11) (PN-12.5) Pipes can sustain a nominal pressure (PN) of 1.24 megapascals at 20 °C.	
3	Consist substantially of polyethylene that conforms to PNS 4427-2002 or equivalent ISO, to which may be added only those additives necessary to facilitate the manufacture of quality pipes of good surface finish and sound physical, mechanical and chemical properties.	
4	None of the additives shall be used separately or together in quantities sufficient to constitute a toxic, organoleptic or microbial growth hazard or to impair the fabrication or welding properties of the product, or to impair the chemical, mechanical and physical properties (particularly long-term hydrostatic and impact strength) as defined in this specification.	
5	The use of the manufacturer's own clean network material produced during the manufacture and production testing of products conforming to this standard is permissible. No other rework material shall be used.	
6	The dimension should be in standard configurations of PE Pipes (SDR-11) (PN-12.5).	
7	Homogeneous throughout and free of cracks, holes, encrustations and other foreign inclusions. Excessive die lines and/or stress marks (particularly in the socket and bell groove) as well as discernible material marbling are not allowed. The ends of the pipe shall be cleanly	

	cut and square to the axis of the pipe.	
8	Pipe shall be homogenous throughout; free from voids, cracks, inclusions, and other defects; and as uniform as commercially practical in black color, density and other physical properties. Pipe surfaces shall be free from nicks and scratches. The end of the pipe shall be cleanly out and square to the axis of the pipe.	
9	When used under the conditions for which they are designed, non-metallic materials in contact with, or likely to come into contact with potable water shall not constitute a toxic hazard, shall not support microbial growth and shall not give rise to unpleasant taste or odor, cloudiness or discoloration of the water.	
10	Concentration of substances, chemicals and biological agents leached from materials in contact with potable water, and measurements of the relevant organoleptic/physical parameters shall not exceed the maximum values recommended by the World Health Organization in its publication "Guidelines for Drinking Water Quality" Vol. 1 "Recommendations" (WHO, Geneva, 1984).	
11	If lead or mono/di-alkyl tin compounds are permitted to be used as stabilizers, the quantities of lead or tin measured as metals shall be determined in accordance with the method described in PNS 4427/ISO 2002.	

12	<p>The physical properties shall conform to the physical properties, to with:</p> <p>✓ Minimum Wall Thickness;</p> <p>For 90mm (OD) = 8.18 mm</p>	
13	<p>The pipe shall not show signs of delamination or disintegration when immersed in acetone. Flattening and/or swelling of the pipe shall not be deemed to constitute failure when tested in accordance with PNS 4427/ISO 2002.</p>	
14	<p>The mass of the specimen shall not increase by more than 0.316 g nor decrease by more than 0.013 g when tested with Sulfuric Acid in accordance with PNS 4427/ISO 2002. The effect of the acid on the surface appearance of the specimen (roughening, bleaching or blackening) shall be ignored.</p>	
15	<p>The pipe shall conform with the applied pressure for the hydrostatic pressure tests of PNS 4427:2002 when tested in accordance with PNS 4427/ISO 2002, to wit:</p>	
16	<p>The pipe shall not show evidence of splitting, cracking and breaking when fattened to a minimum of 40% of its outside diameter when tested in accordance with PNS 800/ASTM D2241.</p>	
17	<p>The pipe shall be clearly marked with the following information spaced at intervals of not more than one meter.</p> <ol style="list-style-type: none"> 1. Name of Product 2. Nominal Outside Diameter, 	

	mm 3. Series and/or Nominal Pressure, MPa 4. Manufacturer's name and/or its recognized trademark 5. The words "Made in PHL" or 6. The words "For Potable Use" 7. Seal, or mark , of the testing agency, that certified the compliance of the pipe in accordance with PNS ISO 4427:2002/AMD 01:2002; PWWA NM 201:2002, Latest edition and the suitability of the pipe material for potable water products.
